AutoCAD

AutoCAD is the de facto standard for 2D drafting and schematic creation. Numerous industry-specific CAD packages and services are available from other vendors. AutoCAD is used by architects, building contractors, engineers, and students. It is one of the most popular professional-level drafting programs in the world.[2] Over 500,000 users in 80 countries use AutoCAD.[3] AutoCAD is licensed under the GNU General Public License, version 2 (GPLv2) and is released on a perpetual, royalty-free basis. It is available in several editions, with the most popular being the 2018 version, called AutoCAD 2018. The most recent revision (version 2019) is released in the early months of 2019. Contents AutoCAD has always been a Windows-only application, and until the release of the 2012/2013 version of AutoCAD, only the Windows operating system has been supported. For this reason, AutoCAD does not run on Unix-based platforms (including OS X and Linux). AutoCAD 2016 and higher run natively on Windows 10, and can be used on other Windows versions (i.e., Windows 7, 8.x, and Windows Server 2003). AutoCAD is a component of AutoCAD LT, a limited functionality, web-based version of AutoCAD. AutoCAD LT is licensed as a cloud-based service through Autodesk's subscription-based service Autodesk Sync. AutoCAD LT can be used on both Windows- and Mac-based computers; however, because of licensing requirements, the software does not run on Linux, FreeBSD, BSD, and other operating systems. AutoCAD LT also offers the option to access the database on a personal computer. However, this requires an additional licensing fee.[5] AutoCAD LT does not contain the full feature set available in AutoCAD. It lacks some features, but these may be added by using third party add-ons. The supported features available in the Standard, Architectural, Plant, and Landscape Editions are listed below. The AutoCAD 2012/2013 and 2015/2016 versions support Windows 7 or later, as well as Windows Server 2008 R2 (32-bit) or later. Although not officially supported, AutoCAD LT 2012/2013 and AutoCAD LT 2015/2016 run on Windows 7, 8, 8.1, 10, and Windows Server

I was trying: var timeStamp = 1528563072; var timeStampNow = new Date().getTime(); var timeStampDiff = timeStamp - timeStampNow; var dateFromDate = new Date(timeStampDiff); but the result is strange: 1446333225 It should be a1d647c40b

Botulinum toxin A (BTX-A) has been used to treat central sleep apnoea (CSA). However, only few case reports are available describing the effects of BTX-A treatment in patients with CSA. To investigate the efficacy of BTX-A treatment for CSA in patients with pre-existing pharyngeal dilator muscles. Patients with CSA who received BTX-A treatment between 2005 and 2012 were identified retrospectively. Patients were identified with various polysomnography (PSG) parameters and subjective questions regarding daytime respiratory symptoms. Relevant PSG parameters were evaluated before and 4-6 months after BTX-A treatment. BTX-A treatment was performed by submucosal injection of 100 units into the stylohyoid and thyrohyoid muscles (n = 15) or the suprahyoid muscles (n = 3). Before treatment, the median Apnoea/Hypopnoea Index (AHI) was 48.6 (16-96), and the median Epworth Sleepiness Scale (ESS) was 13.1 (5-22). Objective sleep evaluation, such as mean arterial oxygen saturation (SaO_2) and minimal oxygen saturation ($MSpO_2$), did not change. Subjective evaluation, such as the number of sleep-related events, did not change, but the proportion of patients who reported respiratory pauses increased significantly. Three patients (20%) were classified as responders, based on reduction in the AHI by more than 50%, while 13 patients (87
