Hi, I have the same problem as «Â »Â », and I think it has something to do with my.jar file. Do you have any idea about how to solve this problem? Also, if it is possible, can you please paste any tutorial on «Â »Â »Â ». Computer network attacks are becoming more common and are typically growing in complexity and sophistication. Accordingly, conventional techniques for defending against computer network attacks may be inadequate. For example, network-based attacks may be launched against the network via a legitimate or illegitimate Internet service provider, and/or by an end-user. New techniques may be developed to defend against and/or deter such attacks. Accordingly, for example, the above-identified U.S. patent application Ser. No. 10/771,455 is directed to techniques for defending against network-based attacks. In particular, the application discloses a scheme for defending against distributed denial-of-service (DDoS) attacks, as well as to detecting and mitigating malware and other types of network-based attacks.Q: LINQ to Entity framework - no load of dependency I've seen several threads on this, but I cannot find an answer to it and my issue seems to be new enough that others have not had an answer to it yet...
