A real-time-strategy game where you must grow your base and improve your weapons in order to become the ultimate firepower. Grow your base by building houses, planting crops, and upgrading your station. Upgrade your weapons by spending them on station upgrades, which can only be earned from a campaign where you actually participate in the war. A simple, yet polished tactical combat experience awaits you in a fully interactive and unique world! Game Trailer: Click below to watch it now! Full Description: Gardening is a tough job, it takes time to upgrade your equipment and your tools, this DLC will give you a head start with an injection of upgrade points.

Provides the following benefits: ★ 15,000 Upgrade Points \*Upgrade Points can be gathered ingame by cutting grass I had fun while it lasted but I had to fight all the time my crew to get it. I would like to know if it is possible to have an unlock for set of weapons my crew is my true strength let me have it to you the first one.

ConceptTECHNOLOGY FACTS This DLC includes two bonus missions, one of them will give you access to the unique weapon set described at the end of the description and the second one will make you be able to plant seeds and cut grass from the background. We encourage players to use the Friendly Fire setting to add some strategy and fun to the game. Well, it's probably a bit too late for this, but I still want to point out, that the previous DLC for DUSK has a tutorial like this. Unfortunately, the tutorial is extremely hard to find, so people tend to miss that part of the game. Besides that, the DLC and the previous one are pretty much the same, except that the upgrades in the previous one are all on the basic missions. I'm currently looking for a DS3D map who's tileset had more than 10 props and is about twice the size of Concrete. A lot of people will find that one because that's all they ever get on any map which is rubbish. Some of the other tilesets can be found in the base game I have. Then there's Evergreen Woods, which has huge trees, but there's no mission to go near. I believe that the level layout is in the files for the Tree and Flower missions, but the rest are in a mission format and there's some

On the eve of the 40th anniversary of Stonewall's opening, this year's winner of the It Gets Better Project contest offers hope for those of us who are still in the closet, and that queer youth will lead our march into a more understanding society. Lulu Martinez will receive \$10,000 and publication in the Post for besting 1,914 other entries, covering the "aging issues of growing up, interacting with the world, and romance, friendship and family." But it's not only about the money. She's also getting a lifetime-earning book deal from Penguin Random House. "Lulu's story is hopeful," Jason Sullivan, executive director of NYC's It Gets Better organization, told BuzzFeed News. "She embodies what It Gets Better is all about. Her power and presence are incredibly vibrant. She's an inspiration to those of us who are straight and achingly gay, and as she said in her letter, she's seen how it got better for some individuals in her life. She's an inspiration to young people who are still waiting on their time." Timeline of SpaceX Starship and Super Heavy development. - cfadvan
