Crack Damas Expert 37213 Cracked Version A: You need to use str.find and str.findall to find the urls before you can use BeautifulSoup. Ex. import requests from bs4 import BeautifulSoup
import re my_list = [] for i in range(50): url = "" page = requests.get(url) soup = BeautifulSoup(page.content, "html.parser") for link in soup.select("table.infobox table.vcard"): try: title = link.select_one('h3/a[title]').text print("{} - {}".format(link.select_one('a[href]').text, title)) except: continue my_list.append(title) From my understanding the try and except blocks should solve your problem. Scientists have discovered a human cell in an embryo that may help to unblock the way for birth defects and other disorders. The team found a human nerve cell in the embryo's cortex around eight weeks of development, according to a new study, which could provide some answers on how to treat many rare diseases. The study, published in the journal Nature, was led by scientists at the Wellcome Sanger Institute. Experts explained that the human cortex is the part of the brain where information is processed, and it is involved in many aspects of the brain including perception, thinking, emotion, and memory. "We study the genetics of human disease in the germ cells," said Professor Julian Marchetti, who led the research team. "We've never before been able to study the physiology of human germ cells like this," he added. "We can now examine the origin and fate of the nerve cells that make up the cortex." Germ cells are the cells in the body that give rise to all e79caf774b
