specific items and equipment such as a jetpack, landmine, or a classic nes controller can be found throughout the level, though only one of each item can be used at a time. players are given 10 lives, with one life added for every point they gain and deducted for every point they lose, though the maximum number of lives a player may have at any time is 99. 1) core design: heavily promoted for the first time, the core gameplay of super meat boy's gameplay heavily features the use of the first-person view, which causes the goal of the player to be a first-person perspective, which is not often found, which can possibly lead to causes dizziness. the perspective also somewhat emphasizes the idea of the player being a tiny target in the game, leading to some of the more frustrating parts of the game, which tend to make players disoriented. due to the original game, super meat boy forever has made various gameplay changes, although the first-person perspective is still retained. some of these changes include the camera, which is now in a standard third-person perspective, which was the same perspective as in the original game, and the changes in the default controls, in which the game is now controlled using the four face buttons (a, b, x, y), instead of the six face buttons (a, b, x, y, l, r). console port: super meat boy for the xbox 360 was published by team meat, the same company which

developed the game. the game was released on the xbox live arcade service on august 12, 2010. in addition to including the main game, it also features six bonus levels. these bonus levels are designed to be challenging. none of them are in the original game, but a secret level in the original game is a part of one of the bonus levels.
